

dashTM Paycard

Paycards as an employee benefit

Does it really matter how you pay your workforce?

In a word, yes. As hiring picks back up, today's workforce wants more control over how and when they get paid.

In fact, 72% of US employees want access to their wages before their payday, and employers who offer flexible wage options are rewarded with higher employee satisfaction, productivity, and retention.

Employees are choosing, and staying with, employers who offer:

- Timely pay without having to wait for checks or cashing checks
- Digital access to funds with the ability to spend, pay bills, transfer funds, and make online purchases
- Free tools like a mobile app and 24/7 cardholder service.
- Protection from check fraud and added security so that wages are always safely transferred to their account

Paperless payroll is the best way to pay employees, and it's easy to add dash[®] Paycards to your existing payroll program.
