

## Data Analyst - Job Posting

### Why is this role important to Prepaid Technologies?

Prepaid Technologies, with headquarters in Birmingham Alabama, is a fast-growing company that offers electronic payment solutions to businesses throughout the US. These solutions utilize Visa and MasterCard prepaid vehicles and are distributed primarily through corporations. Our focus is on providing corporate payment solutions related to the following prepaid products: Payroll, Corporate Reward and Incentive, Corporate Purchasing, and Corporate Disbursement.

For the past several years we have experienced tremendous growth and we continue to see a phenomenal opportunity in the prepaid industry. We have a great company, an excellent team, and years of experience developing prepaid products and managing prepaid programs.

Our growth has created opportunities to expand our Data Science/Analytics team and are currently seeking individuals to join the team. This team supports all departments of Prepaid Technologies in their data and reporting related needs.

### Responsibilities of a Data Analyst at PT

- Ensure on-time delivery and quality of work.
- Creative problem solving on reporting needs.
- Identify areas for process improvement to provide efficient data support to the organization.
- Identifying, analyzing, and interpreting trends or patterns in complex data sets.
- Design, develop and implement reports using Power BI.
- Design efficient SQL against relational databases hosted in different data warehouses.
- Perform other duties and responsibilities as assigned by management.

### Required Skills:

- SQL knowledge and experience preferred - comfortable working with complex joins, stored procedures, and unstructured data
- Data modeling/application development is not required but is a plus
- Excellent communication skills. Ability to share, discuss, and analyze results with stakeholders having varying levels of technical background
- Go-getter, driven to seek out solutions, help others, and always asking questions
- Experience with data visualization tools (Power BI would be preferred)
- Proficiency with MS Excel
- Analytical with a passion for solving problems
